

STAFF INDUCTION

Show a new starter the ropes.

Use this guide while you take a new team member through their first shift. Demonstrate each step, let them have a go, then tick it off as you cover it.

DETAILS

NEW TEAM MEMBER

DATE

HOW A CLEAN FLOWS

1 Bathroom start here

2 Toilet paper only

3 Kitchen top to bottom

4 Dusting leave it dust-free

5 Vacuum edges and corners

6 Mop & finish back of house to the door

Ideal pace — a full clean runs about 1½–2¼ hours, depending on the home.

How to use this For each step — show them how, let them try, then tick it once they've got it.

STATION 01

The tub & set-up

Know your kit before you start

What's in the tub

- ☐ Sponge
- ☐ Gumption
- ☐ Glass cleaner — windows and mirrors.

- ☐ Vinegar — shower screens, grout and stainless steel.
- ☐ Multipurpose — general surfaces.
- ☐ Gloves
- ☐ Skewer
- ☐ Grout brush — for mould and build-up.
- ☐ Small brush
- ☐ Paper towel
- ☐ Magic Eraser
- ☐ Floor cleaner — for the floors.
- ☐ 9 cloths — show what each one is for.
- ☐ 2 × plastic bags — one for dirty cloths, one for rubbish.

Set-up standards

- ☐ Walk them through the order we clean in.
- ☐ Keep the tub tidy as you work.

Remember The tub is left exactly as it was given to you — same items, same layout — ready for the next shift.

Bathroom

Where most cleans begin

Sinks, taps & shower

- ☐ Clean the sink, and carefully around the knobs and taps.
- ☐ Pay extra attention right around the base of the taps.
- ☐ Clean the shower doors and screens (vinegar works well on the glass).
- ☐ Check the grout for mould — use the grout brush on any mould or build-up.

Mirrors

- ☐ Spray with glass cleaner and wipe with a cloth until streak-free.

Surfaces & cabinets

- ☐ Clean around the taps and the drain.
- ☐ Wipe down every bottle and product — lift each one and wipe underneath.
- ☐ Wipe the front of the cabinet doors.

Toilet

A clean, hygienic finish

- ☐ Never use cloths on the toilet — paper only.
- ☐ Spray with multipurpose, or use vinegar inside the bowl (it disinfects).
- ☐ Wipe it down with toilet paper.
- ☐ Give the bowl a good brush.
- ☐ Clean around the outside of the toilet.

Important Cloths never touch the toilet — we always use paper.

Kitchen

Top to bottom, lifting as you go

Cooktop & sinks (start here)

- ☐ Clean the sinks.
- ☐ Gas cooktop: spray everything down, take the parts off, and wipe down.
- ☐ Ceramic / electric cooktop: spray well and wipe down.

Benches & appliances

- ☐ Clear and wipe the benches.
- ☐ Appliances like the toaster: spray, wipe, and wipe underneath.
- ☐ Always lift objects and wipe under them — never just around them.
- ☐ Wipe the front of the range hood (the front only, not underneath).
- ☐ Wipe the front of the fridge.

Cupboards & microwave

- ☐ Once benches, sinks and cooktop are done, spray and wipe the cupboard doors — lower and upper.
- ☐ Don't forget the microwave — clean inside and out.

STATION 05

 10–15 min

Dusting

Quick, but leave it dust-free

-
- ☐ A quick once-over with the duster and a cloth — leave the place dust-free.
 - ☐ Use the duster to catch any cobwebs as you go.
 - ☐ Doesn't need doing every visit, but always stay on top of dust and cobwebs.

Remember Move carefully around the home — take care not to knock or break anything.

STATION 06

🕒 20–30 min

Vacuum

Use it right, pack it right

What's in the bag

- ☐ The tubes, the head and the spare vacuum bags all live in the bag.
- ☐ The duster goes back into the vacuum bag too.

Vacuuming

- ☐ Vacuum the floors thoroughly.
- ☐ For corners and edges, take the head off and do them properly.

Important Never vacuum up water.

Packing up — the cord

- ☐ Roll the cord from the machine end (closest to the machine), never from the plug — that's what stops it tangling.
- ☐ Pack the vacuum back into its bag the way you showed them.

Mop & finish

Back of the house to the front door

Fill the bucket

- ☐ Add a couple of squirts of detergent — not too much (it gets frothy). Add more only if needed.
- ☐ Fill about halfway with hot water (preferably).
- ☐ No laundry access? Boil the kettle and use that for the hot water.

Mopping

- ☐ Keep the mop as dry as you can.
- ☐ Get into the corners and clean the floor well.
- ☐ Start at the back of the house and work towards the front — so you never walk back over a wet floor.

Important Never rub or drag plastic across the floor — it scratches. Use only the mop on the floor.

Before you leave

- ☐ Tip all the water out.
- ☐ Repack the tub exactly as you found it.

- ☐ Do a final look around and switch off all the lights.

NOTES

Anything to revisit next shift, or feedback on how they went.

That's a NATURO clean.

Thanks for setting them up to do great work.
